1 DATA STANDARD

1.1 Introduction

1.1.1 Application

This standard can be used to store or exchange data identifying a classification that may be used for a PARTY PERSONAL ASSESSMENT undertaken such as early help triage, early help, Team Around the Child (TAC) or a specialist assessment. The classifications are defined by an individual PARTY such as a Local Authority.

1.1.2 Compatibility with non-ISB standards

There are no known compatibility issues related to this standard.

1.1.3 Terminology and notation

The following sections contain:

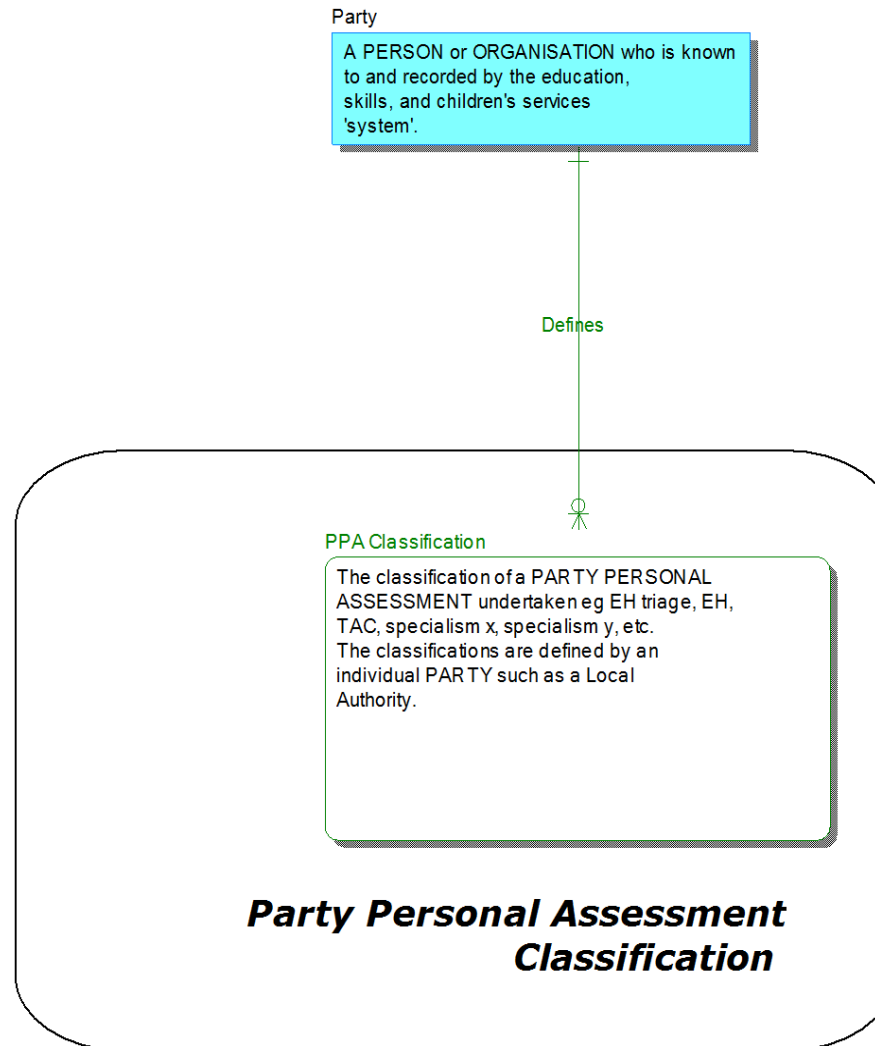

- **Entity Definition Model** – A high level diagram showing: entities; their descriptions and relationships
- **Attribute Model** – A lower level diagram showing the names of attributes making up entities. Attributes in the top section of an entities box are those making up its primary key
- **Data Definitions** – Detailed descriptions of each of the entities at an attribute level, showing attribute: name; definition; whether it is part of a key; whether it is mandatory; its data type and format; parent information and Controlled List association

Only those entities within the boundary square in the diagrams are part of this particular data standard, entities outside the boundary are shown for context purposes only (and can be found within other Business Data Standards), or separate Controlled List reference data.

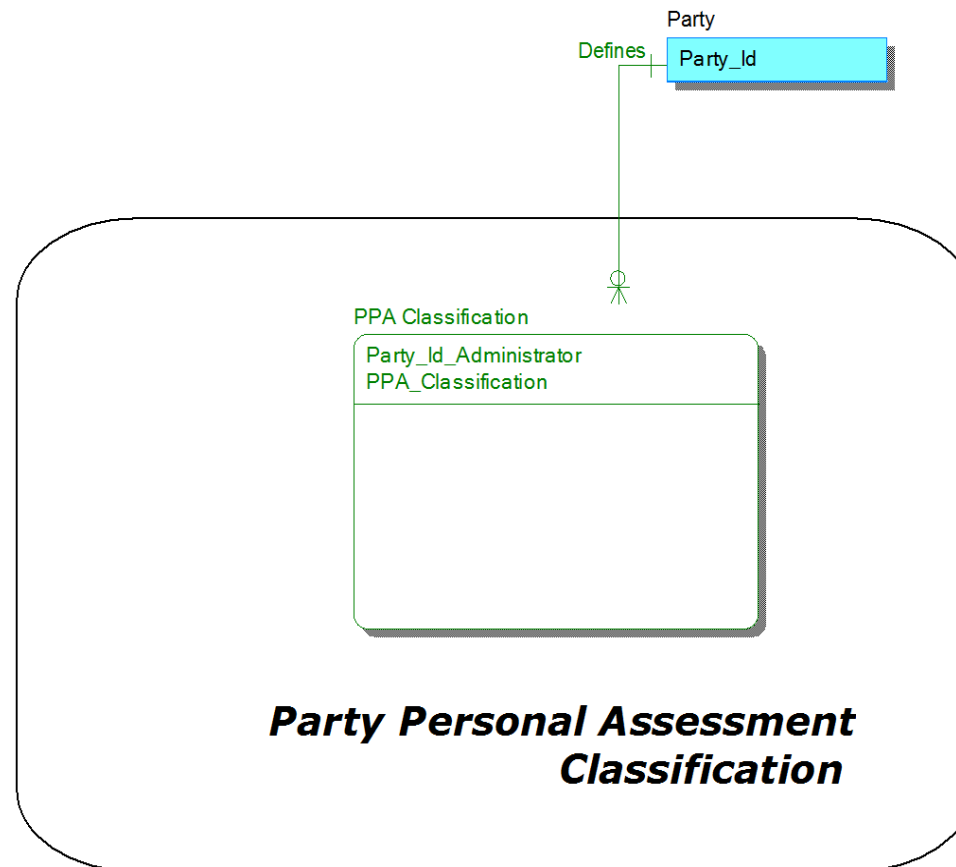

The standards for naming, notation and conventions used for this development can be found in the BDA Data Architecture Modelling Standards document. For convenience, a quick reference of the colours used in these diagrams is shown below.

1.2 Entity Definition Model

1.3 Attribute Model

1.4 Data Definitions

1.4.1 Entity: PPA Classification

The classification of a PARTY PERSONAL ASSESSMENT undertaken eg EH triage, EH, TAC, specialism x, specialism y, etc. The classifications are defined by an individual PARTY such as a Local Authority.

Attribute Name	Attribute Definition	P K	F K	M	Datatype	FK Source Entity	FK Source Attribute	Controlled List
Party_Id_Administrator ¹	A value that denotes and distinguishes the PARTY.	Y	Y	Y	Unicode_String(1,32)	Party	Party_Id	
PPA_Classification	The classification of PARTY PERSONAL ASSESSMENTS undertaken eg EH triage, EH, TAC, specialism x, specialism y, etc. The list is as applicable to an individual PARTY such as a Local Authority..	Y	N	Y	Unicode_String(1,50)			

¹ The administrator Party Id of the PPA Classification values.

2 CHANGES FROM PREVIOUS VERSION

Not applicable.
