# 1 DATA STANDARD

## 1.1 Introduction

### 1.1.1 Application

A Party Contact holds the data defining the relationship between a PARTY and the various LOCATORs such a telephone, addresses and identifies the context in which they are used such as home address, personal telephone number.

### 1.1.2 Compatibility with non-ISB standards

There are no known compatibility issues related to this standard.

File: BDS-Party-Contact	Page 3 of 10	Version: 6.0 Status: Deprecated	Issue Date: 26/04/2016 BDA Version: 12
-------------------------	--------------	------------------------------------	---

### 1.1.3 Terminology and notation

The following sections contain:

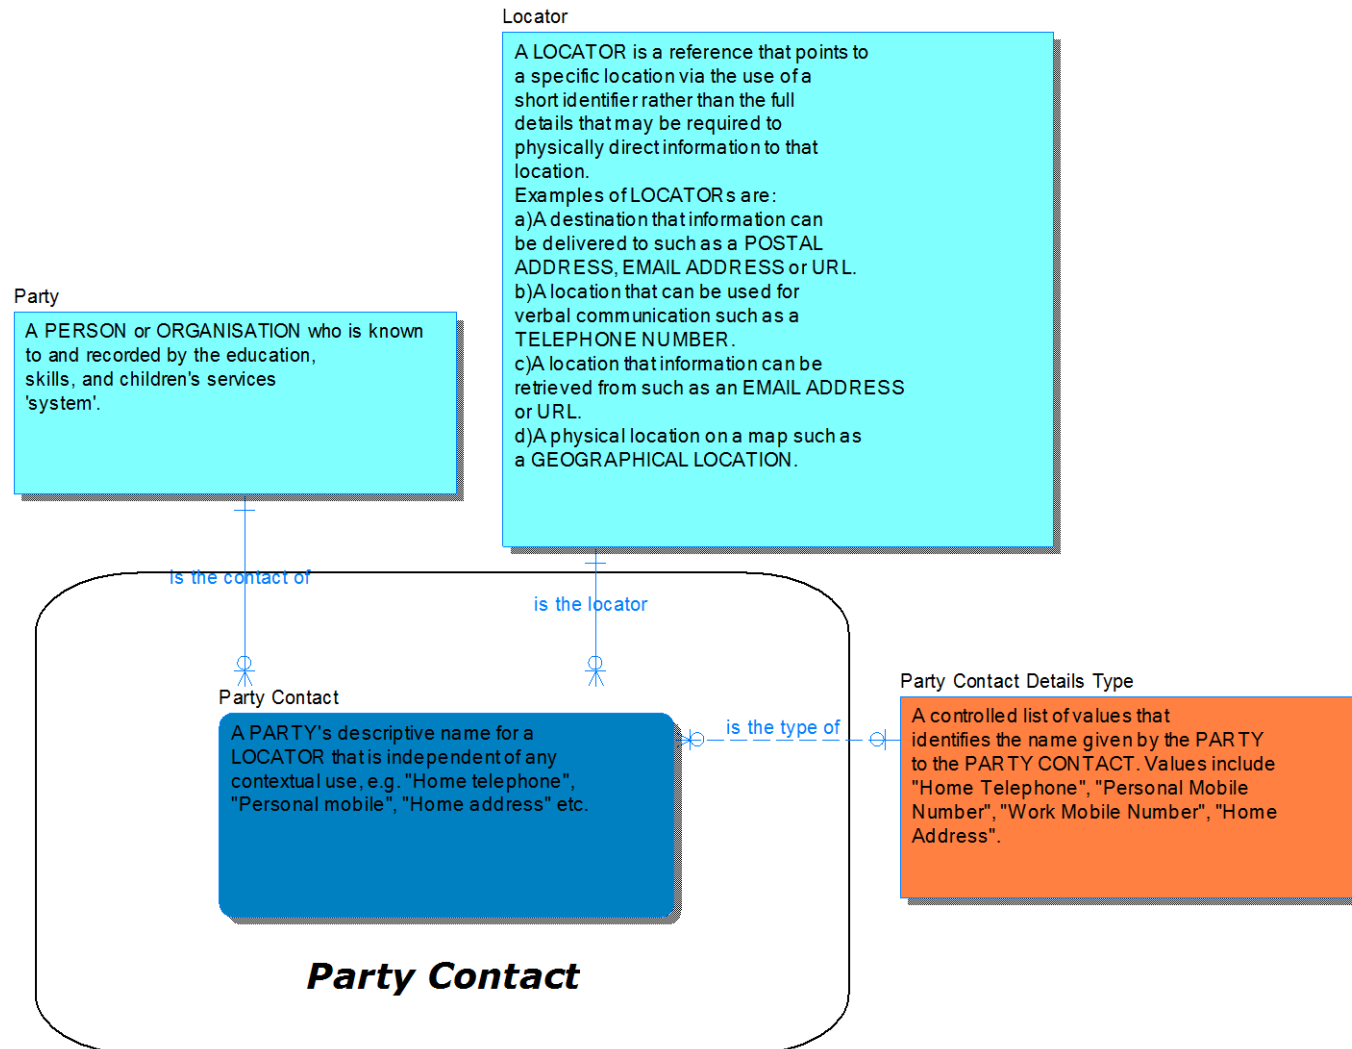

- **Entity Definition Model** – A high level diagram showing: entities; their descriptions and relationships
- **Attribute Model** – A lower level diagram showing the names of attributes making up entities. Attributes in the top section of an entities box are those making up its primary key
- **Data Definitions** – Detailed descriptions of each of the entities at an attribute level, showing attribute: name; definition; whether it is part of a key; whether it is mandatory; its data type and format; parent information and Controlled List association

Only those entities within the boundary square in the diagrams are part of this particular data standard, entities outside the boundary are shown for context purposes only (and can be found within other Business Data Standards), or separate Controlled List reference data.

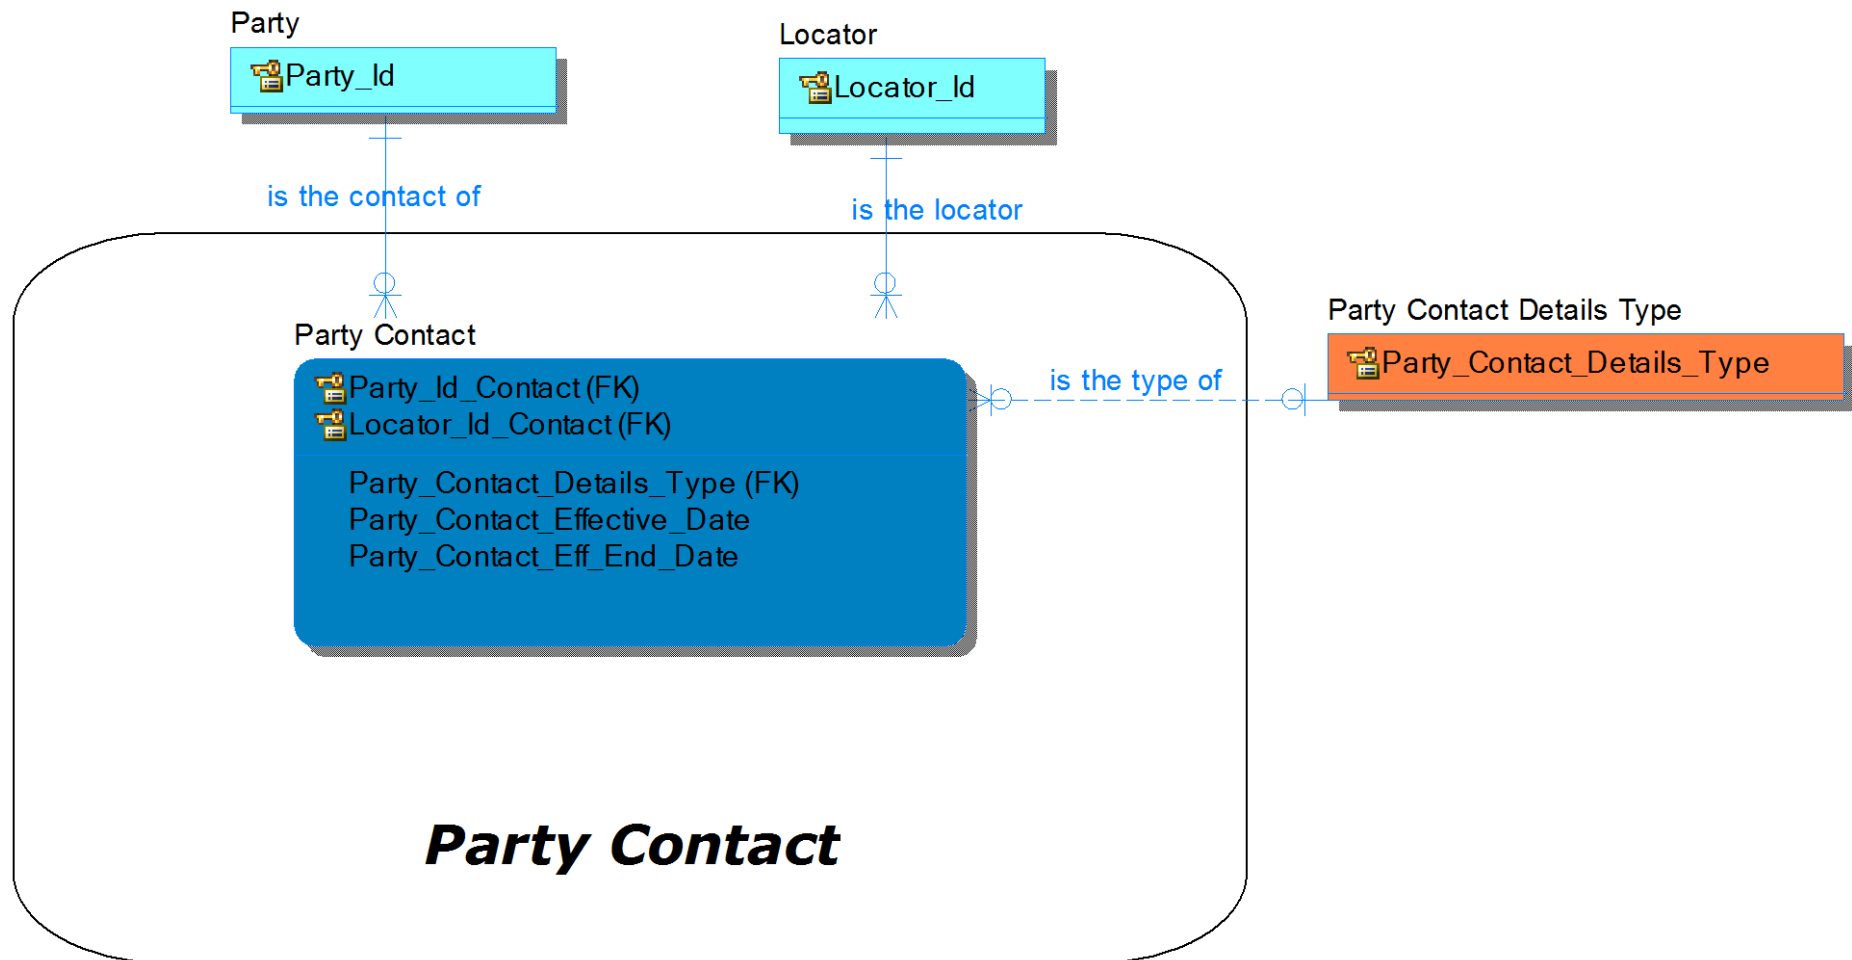

The standards for naming, notation and conventions used for this development can be found in the BDA Data Architecture Modelling Standards document. For convenience, a quick reference of the colours used in these diagrams is shown below.

## 1.2 Entity Definition Model

### 1.3 Attribute Model

## 1.4 Data Definitions

### 1.4.1 Associate Entity: Party Contact

A PARTY's descriptive name for a LOCATOR that is independent of any contextual use, e.g. "Home telephone", "Personal mobile", "Home address" etc.

Attribute Name	Attribute Definition	P K	F K	M	Datatype	FK Source Entity	FK Source Attribute	Controlled List
Party_Id_Contact	A value that denotes and distinguishes the PARTY.	Y	Y	Y	Unicode_String(1,32)	Party	Party_Id	
Locator_Id_Contact	A value that denotes and distinguishes the LOCATOR.	Y	Y	Y	Simple_String(1,600)	Locator	Locator_Id	
Party_Contact_Details_Type	A controlled list of values that identifies the name given by the PARTY to the PARTY CONTACT. Values include "Home Telephone", "Personal Mobile Number", "Work Mobile Number", "Home Address".	N	Y	N	Unicode_String(1,50)			Party Contact Details Type
Party_Contact_Effective_Date	The date and time from which the LOCATOR starts being related to the PARTY. I.e. when a person moves into a new residence, or acquires a TELEPHONE NUMBER or EMAIL ADDRESS etc.	N	N	N	Simple_Date Time			

Attribute Name	Attribute Definition	P K	F K	M	Datatype	FK Source Entity	FK Source Attribute	Controlled List
Party_Contact_Eff_End_Date	The date and time on which the PARTY ends their relationship to the LOCATOR e.g. when a PERSON leaves their old residence.	N	N	N	Simple_Date Time			

## 2 CHANGES FROM PREVIOUS VERSION

This standard has been deprecated as part of Party Contact refinement.

## 3 NOTES

Version 1.0 of this standard was issued as Stakeholder Contact, but the standard was renamed following an ISB decision to change Stakeholder to Party across all ISB data standards.
