## 1 OVERVIEW

This Release Note identifies the changes that have been applied to the ISB document set resulting in version August 2016 of the standards as published on the [ISB Standards Library](#) on 19 December 2016.

It identifies the standards and any supporting documents that have been affected as a result of the changes implemented in the release as listed below.

The purpose of the release is to resolve the issues that have been identified, and detailed in Section 2 of this release note, with the implication being that the ISB Data Standards can be sufficiently implemented within the ESCS business and operational processes.

The changes identified in this release note have been subjected to public consultation with any arising issues all being addressed and resolved, and approved by the ISB Board prior to publication.

All of the ISB Business Data Standards (BDSs), Controlled Lists (CLs), Technical Data Standards (TDSs) and Supporting documentation can be found in the [ISB Standards Library](#).

### 3 CHANGE SUMMARY

#### 3.1 Minor Improvements and Maintenance changes

The Aggregated Leavers Destination Controlled List Standards were published in the August 2015 Release, however, they are embedded in the Leavers Destination Aggregated Data Standard. To remain consistent on the website we are publishing separate web pages for each controlled list. No changes have been made to these controlled lists.

The ISB Controlled List Standard Learning Event Status Type has been updated due to general maintenance issues; the value “Active” has been removed from the list and the values “Planned” and “Actual” have been added.

## **6 KNOWN ISSUES**

There are no known issues as a result of this release.

## **7 BACKWARDS COMPATIBILITY**

There can be two causes for backwards compatibility issues. These are Primary Key changes and deprecated standards.

### **7.1 Primary Key Changes**
